

SyncGene Enterprise Edition

Synchronize Calendars, Contacts & Tasks across
Office 365, Google Workspace, iCloud & mobile devices

SyncGene Enterprise is a cross-platform cloud-based Web service that syncs Calendars, Contacts and Tasks across business devices.

Automate synchronization between Office 365, Google Workplace and iCloud accounts. Reduce manual efforts keeping your Contacts up-to-date across all accounts and devices. Update critical meetings on smartphones and laptops.

Use the service in multiple scenarios:

- ▶ Migrate data from one platform to another one-time.
- ▶ Sync company data constantly.

 SyncGene does it all

Boost productivity with Calendars, Contacts, Tasks that are always synced on business devices.

One product, many solutions

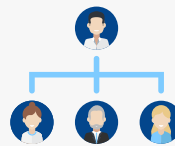

Unlimited amount of users at once.

Import an entire organization worth of accounts at once, in just a few clicks. Add members individually or use CSV files with account information and synchronization sources.

Salesforce Contacts synchronization.

Sync Contacts from Salesforce with iCloud, Google, and Microsoft Exchange. A single Salesforce license with API integration is needed to manage the business.

Centralized administration and billing.

Use the admin panel to manage member accessibility, control user data, see synchronization status for each account. View billing information in one place and consolidate spending into a single payment.

Contact List Sharing.

One Shared Contact list for all company devices. Share Contacts with users outside the organization as well.

Why SyncGene?

Need a custom solution for your business? SyncGene is flexible – we will adapt specific features to your requirements, in an optimal time frame.

Fast customer service, worldwide support. [Live Chat](#) instant access on USA and Europe business hours.

Privacy and security – guaranteed. The service does not store any information. It only moves data from one platform to another.
